

Uni Jetstream 4&1 Multi Pen Technical Description

Introduction

The Uni Jetstream 4&1 Multi Pen ("Multi Pen") is like four pens (and a pencil) packed into one. Choose between the 0.5mm and 0.7mm pen sizes. Each option includes a 0.5mm pencil. The Multi Pen is a great option for hobbyists and professionals alike looking to consolidate their writing options into one convenient, easy-to-carry form factor.

Specifications

Appearance

The Multi Pen is 5.8 inches long (when retracted) and weighs 0.83 ounces. The Multi Pen is available in a variety of body colors, including black, blue, red, and purple.

The pen starts with a metal tip and a rubber grip. The body of the pen is plastic. The pen ends with a metal clip, four color-coded levers, and a plastic cap.

Writing Options

The Multi Pen includes four ink color options:

- Black
- Blue
- Green
- Red

Choosing your preferred color of ink is as easy as sliding the color-coded lever at the end of the pen. In addition to the four ink color options, the Multi Pen also includes an option for writing in pencil. You can write in pencil by sliding the metal clip to reveal the pencil tool. Removing the plastic cap at the end of the pen reveals a pencil eraser.

Accessing Ink Cartridges and Pencil Lead

To access the ink cartridges and pencil lead (such as when it is time to replace or replenish these items), simply twist off the top portion of the pen. Ink and pencil lead refills can be purchased at various office supply stores and other retailers.
